

SQL Assignment – 3

Overview of SQL.

1) Does ANSI recognize the data type DATE?

Ans:- Yes, ANSI recognize the data type DATE. It's format as specified by ANSI is 'YYYY-MM-DD'. The range that MySQL supports is from 1st Jan 1000 A.D. to 31st Dec 9999 A.D. As dates are stored internally as numbers, difference between two dates can be calculated (date1-date2). Internally it is stored as fixed length number and it occupied 7 Bytes of storage.

2) Which subdivision of SQL is used to insert values in tables?

Ans:- DML(Data Manipulation Language) is the subdivision of SQL that is used to insert values in tables.
